

Daum Dragon Sun

By THG Paris

There has never been such an exquisite use of color as those seen in THG's Dragon Collection. Working with Daum's crystal, created using *pâte-de-verre*, a technique that uses the lost-wax method to make a mold for the sculpture, THG has again crafted products that stand on their own as sculpture for the bath. The Dragon Collection exudes a strength of will combined with the innate aesthetic sensibility that defines all of THG's products. Available in three color variations; Sun, Moon and Jade, each might be called a celestial marriage of art and design.
